Applicant(s)

PETERSON, KENNETH C.

Examiner

Mark A. Robinson

Art Unit

2872

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 and 13-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Foote (US 6394616).

Regarding claims 1 and 13, Foote discloses a mirror assembly including a base(22), housing(20) with reflective element and mounted for movement between retracted and extended positions, an actuator (figs. 7,9) for moving the housing between the retracted and extended positions, and a slip clutch(76,90,92,94) associated with the actuator for accommodating impeded movement of the housing with respect to the base.

Foote further discloses the actuator to include a drive assembly comprising a drive screw(48) driven by the motor(44) and a drive nut(76) received on the drive screw and connected to the mirror housing for extending/retracting the housing.

Art Unit: 2872

Claims 2-5, 7-9, 14-17 and 19-21 contain functional recitations rather than structural limitations. Apparatus claims must be distinguished from the prior art in terms of structure rather than function. See MPEP 2114. Accordingly, since the structural limitations set forth in the claims are disclosed by the reference, the claims are anticipated thereby.

#### ***Allowable Subject Matter***

3. Claims 10-12 and 22-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest the particular structural limitations directed to the drive screw and slip clutch, specifically concerning the arcuate finger(s) which engages the cylindrical surface(s), as set forth in the combination of either claim 10 or 22.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references

Art Unit: 2872

to Whitehead disclose various arrangements for clutch mechanisms.
